

NEW LOCKERS AND ACCESSORIES

Standard Lockers *the industry benchmark*

Republic's Standard Locker offers economical storage of personal effects in schools, parks and recreation areas, offices and industrial locker rooms. Continuous vertical door strikes, heavy gauge frame hooks and full-flanged, channel edged doors lend quality and security to the locker. Recognized by its recessed handle and distinctive door louvers, the Standard Locker serves as the industry benchmark for durability, reliability and value. Many sizes of Standard Lockers are available for immediate shipment from our Qwik-Ship Inventory.

Standard Features:

Material: Door - 16 or 18 ga. mild cold rolled steel. Body - 24 ga. mild cold rolled steel.

Assembly: Knocked down (KD), assembled with nuts and bolts.

Hinge: Full loop, 2" 5-knuckle hinges nested in door slot; welded to frame and double-riveted to door.

Handle: Stainless steel recessed handle with plastic-protected lifting trigger. Able to accept padlock or built-in lock. Meets ADA requirements for accessibility.

Latching: Tiered-quiet, multi-point latching on heavy gauge frame hooks with rubber silencers that reduce noise. Concealed quiet lock bar locked in place and isolated from metal to metal contact by polyethylene glides. Box - padlock hasp and steel strike plate with integral door pull.

Ventilation: Louvers; door perimeter.

Optional Features:

Material: Door - 16 or 18 ga. galvanized steel. Body - 16 ga. mild cold rolled steel; 24 ga. or 16 ga. galvanized steel; stainless steel bottoms.

Assembly: Knocked down (KD), assembled with rivets or Keps nuts and bolts.

Handle: #12 lift handle

Hinge: Continuous "piano" style hinge.

Ventilation: Full louvers; verti-vents; visual slots.

NEW LOCKERS AND ACCESSORIES

Heavy Duty Ventilated *built to last*

Republic's Heavy Duty Ventilated Lockers are designed to meet the harsh requirements of an athletic room environment. Built to last, these lockers feature knocked down construction, rugged 14 gauge doors, a heavy gauge body, multiple latching options and our premium paint finish throughout.

Standard Features:

Material: Door - 14 ga. mild cold rolled steel. Body - 16 ga. mild cold rolled steel (18 ga. backs).

Assembly: Knocked down (KD), assembled with rivets or nuts and bolts.

Hinge: Full loop, 2" 5-knuckle hinges nested in door slot; welded to frame and double-riveted to door.

Handle: Tiered - stainless steel recessed handle with plastic-protected lifting trigger. Able to accept a padlock or a built-in lock. Meets ADA requirements for accessibility. Box - finger operated trigger punched to accept a padlock.

Latching: Tiered - quiet, multi-point latching on heavy gauge frame hooks with rubber silencers that reduce noise. Concealed quiet lock bar locked in place and isolated from metal to metal contact by polyethylene glides. Box - spring latch device welded to door automatically engages upon door closure.

Ventilation: Door (tiered) - large diamond perforations; doors (box) - small diamond perforations; Side - large diamond perforations - solid sides can be requested for either row ends or all sides.

Optional Features:

Material: Door - 14 ga. galvanized steel. Body - 16 ga. galvanized steel; stainless steel bottoms.

Assembly: Knocked down (KD), assembled with Keps nuts and bolts or rivets.

Hinge: Continuous "piano" style hinge.

Handle/Latching: 7 ga. plated steel turn handle for three point latching at top, side and bottom of locker.

Ventilation: Louvers; full louvers; mini-louvers.

Republic's Qwik-Ship Lockers are in stock for immediate shipment. They feature heavy 16 or 18 gauge steel doors mounted in welded frame assemblies for strength and durability. Reliable recessed handle and proven latching system ensure maximum security, while louvers provide ventilation. Lockers are conveniently available in pre-packaged, 1-wide and 3-wide groupings. Lockers include 6" legs for an overall finished height of 66" or 78". All sizes shown are in stock in #83 Decorator Tan. Part numbers with an * are also available in #50 Gray.

Standard Features:

Material: Door - 16 or 18 ga. mild cold rolled steel. Body - 24 ga. mild cold rolled steel.

Assembly: Knocked down (KD), assembled with nuts and bolts.

Hinge: Full loop, 2" 5-knuckle hinges nested in door slot; welded to frame and double-riveted to door.

Handle: Stainless steel recessed handle with plastic-protected lifting trigger. Punched to accept a padlock or a built-in lock. Meets ADA requirements for accessibility.

Latching: Tiered-quiet, multi-point latching on heavy gauge frame hooks with rubber silencers that reduce noise. Concealed quiet lock bar locked in place and isolated from metal to metal contact by polyethylene glides. Box - padlock hasp and steel strike plate with integral door pull.

Ventilation: Louvers; door perimeter.

Optional Accessories:

Front and End Bases: 20 ga., used to close the bottom areas between locker legs.

Individual Sloping Tops: Provide a finished appearance and discourage the use of locker tops as storage areas. End Panels are required to close ends of locker groups - order separately.

Recess Trim: Used to cover the gap between lockers and walls in a recessed installation.

Fillers: Corner angles, angle fillers and slip joint fillers are used to fill open areas or corners between individual units.

NEW LOCKERS AND ACCESSORIES

Finish Trim

6" legs can be added to all lockers. Front legs are an extension of vertical frames. Adjustable rear angle legs are provided for every third upright in a row.

20 gauge Closed Front and End Bases may be used to close the bottom areas of lockers with legs.

16 gauge Zee Bases raise lockers above the floor and create an overhang or "toe space" for lockers. Zee Bases are available in 3", 4" and 6" heights.

Recess Trim has a 3" face and a 3/8" top return. Integral corner caps and hairline joints reinforced with welded-on splice fingers create a clean frame effect for recessed lockers.

Individual Sloping Tops provide a finished appearance and discourage the use of locker tops as storage areas. The rise is 1/3 of the locker depth. Standard flat tops are omitted when sloping tops are used.

Continuous Sloping Tops provide a finished appearance for lockers mounted along walls or in island groups. The rise of the slope is 1/3 of the locker depth. Customized installations with sloping top splices, valley corners and hip ends - all with concealed fasteners.

Ventilation

Standard Louvers are arranged in patterns of six, three or two depending on door size.

Verti-Vent Perforations in the top and bottom flanges of locker doors enhance perimeter ventilation.

Diamond Perforations are 3/4" w x 1-1/2" h and are standard in doors and uprights of athletic lockers.

Round Perforations are groups of forty-two 1/2" holes on 1" centers arranged in various patterns on backs and uprights.

Full Louvers add extra ventilation by extending the louvers for the full height of the locker door.

Mini-Louvers provide ventilation of athletic lockers while concealing locker contents. 3/4" w x 3/8" h, they are available on all athletic locker doors.

Small Diamond Perforations are 7/16" w x 15/16" h and are available in uprights and doors of athletic lockers.

Visual Slots 5/8" w x 1-1/8 h provide free air flow through the locker.

LOCKER COLOR CHARTS

REPUBLIC COLORS

PENCO COLORS

Product colors are reproduced as accurately as possible. Final color selection should be made from actual samples.

BENCHES

Fixed Pedestals have an overall height of 17-1/2". Benches are 9-1/2" wide x 1-1/4" full finished thickness laminated maple. Pedestals consist of sturdy 1-1/4" diameter tubing with 10 gauge steel flanges welded to each end.

Moveable Pedestals consist of maple bench tops mounted to free standing trapezoidal-shaped pedestals. Pedestals are made from 1/4" x 3" aluminum bar stock and feature a black anodized finish. Non-skid pads are provided for each pedestal.

BENCH

Length	Part No.	Price
36"	LBT 36	\$ 46.50
48"	LBT 48	\$ 63.00
60"	LBT 60	\$ 77.25
72"	LBT 72	\$ 93.00
84"	LBT 85	\$109.50
96"	LBT 96	\$123.75
108"	LBT 108	\$144.75
120"	LBT 120	\$160.50
132"	LBT 132	\$184.50
144"	LBT 144	\$201.00

Bench tops less than 96" use 2 pedestals.
 Bench tops 96" and larger use 3 pedestals.

LOCKER REFURBISHING

**Why do Your
Lockers Look Like
This..**

**When They
Could Look Like This?**

**Refurbish your lockers at
10% to 20% of Replacement cost!**

Your lockers can be totally restored!

- Parts replaced as necessary.
- Lockers re-anchored.
- New lockers installed for extra capacity.
- Prepare locker surfaces.
- Lockers repainted using an electrostatic process.
- New number plates attached.

If you can't replace your lockers with new, refurbish them and give your school a face lift while saving your valuable budget.

Please call our office or visit our website at www.centarind.com and fill out a form under locker refurbishing for a free evaluation and estimate! Not available in all areas.

Your lockers will go through extensive inspections. Everything will be done to bring your lockers back to 100% functionality. Any parts that may be missing or faulty will be replaced, including hinges, latches, or if necessary the entire door. Bolts are replaced with rivets for even better security and longevity. After the lockers are completely restored, banks of lockers are inspected for proper installation to the wall and are anchored where necessary.

Then the real restoration begins. Centar uses only the highest quality paint. Polyurethane or 2 part epoxy with an optional clear coat. For a long lasting paint finish we use electrostatic refinishing. The locker surfaces are prepped, washed, and areas not to be painted are masked. Then the lockers are painted with a base coat, top coat and finally a texturing coat that will give the refurbished lockers the appearance of new at a fraction of the cost.

Once the lockers have been painted new number plates will be added and the handles and locks will be reinstalled (new locks are available for an additional cost).
