

LOCKER REFURBISHING

Refurbish your lockers at 10% to 20% of Replacement cost!

Your lockers can be totally restored!

- Parts replaced as necessary.
- Lockers re-anchored.
- New lockers installed for extra capacity.
- Prepare locker surfaces.
- Lockers repainted using an electrostatic process.
- New number plates attached.

If you can't replace your lockers with new, refurbish them and give your school a face lift while saving your valuable budget.

Please call our office or visit our website at www.centarind.com and fill out a form under locker refurbishing for a free evaluation and estimate! Not available in all areas.

Your lockers will go through extensive inspections. Everything will be done to bring your lockers back to 100% functionality. Any parts that may be missing or faulty will be replaced, including hinges, latches, or if necessary the entire door. Bolts are replaced with rivets for even better security and longevity. After the lockers are completely restored, banks of lockers are inspected for proper installation to the wall and are anchored where necessary.

Then the real restoration begins. Centar uses only the highest quality paint. Polyurethane or 2 part epoxy with an optional clear coat. For a long lasting paint finish we use electrostatic refinishing. The locker surfaces are prepped, washed, and areas not to be painted are masked. Then the lockers are painted with a base coat, top coat and finally a texturing coat that will give the refurbished lockers the appearance of new at a fraction of the cost.

Once the lockers have been painted new number plates will be added and the handles and locks will be reinstalled (new locks are available for an additional cost).
