# RETRO-FIT BOARDS

The retro-fit boards are made to fit over the top of an existing board. These boards are white 28 ga porcelain on a steel markerboard surface which is laminated to a 1/4" hardboard with a mylar backer, 1" face aluminum trim and NO tray.

These boards may be installed over wood or aluminum framed boards and are pre-drilled for installation. All installation hardware is included.

To determine the size of the board you need, measure the existing board from the top outer edge to the top of the tray and from side to side (outer edges).

All Retro-Fit boards are made to order and are non-returnable.

Part No.	Description
RF-406	4 x 6 Retro-fit Board
RF-408	4 x 8 Retro-fit Board
RF-410	4 x 10 Retro-fit Board
RF-412	4 x 12 Retro-fit Board
RF-416	4 x 16 Retro-fit Board

# NEW LOCKERS AND ACCESSORIES

## Standard Lockers *the industry benchmark*

**Republic's Standard Locker** offers economical storage of personal effects in schools, parks and recreation areas, offices and industrial locker rooms. Continuous vertical door strikes, heavy gauge frame hooks and full-flanged, channel edged doors lend quality and security to the locker. Recognized by its recessed handle and distinctive door louvers, the Standard Locker serves as the industry benchmark for durability, reliability and value. Many sizes of Standard Lockers are available for immediate shipment from our Qwik-Ship Inventory.

### Standard Features:

**Material:** Door - 16 or 18 ga. mild cold rolled steel. Body - 24 ga. mild cold rolled steel.

**Assembly:** Knocked down (KD), assembled with nuts and bolts.

**Hinge:** Full loop, 2" 5-knuckle hinges nested in door slot; welded to frame and double-riveted to door.

**Handle:** Stainless steel recessed handle with plastic-protected lifting trigger. Able to accept padlock or built-in lock. Meets ADA requirements for accessibility.

**Latching:** Tiered-quiet, multi-point latching on heavy gauge frame hooks with rubber silencers that reduce noise. Concealed quiet lock bar locked in place and isolated from metal to metal contact by polyethylene glides. Box - padlock hasp and steel strike plate with integral door pull.

**Ventilation:** Louvers; door perimeter.

### Optional Features:

**Material:** Door - 16 or 18 ga. galvanized steel. Body - 16 ga. mild cold rolled steel; 24 ga. or 16 ga. galvanized steel; stainless steel bottoms.

**Assembly:** Knocked down (KD), assembled with rivets or Keps nuts and bolts.

**Handle:** #12 lift handle

**Hinge:** Continuous "piano" style hinge.

**Ventilation:** Full louvers; verti-vents; visual slots.

# NEW LOCKERS AND ACCESSORIES

## Heavy Duty Ventilated *built to last*

### Republic's Heavy Duty Ventilated Lockers

are designed to meet the harsh requirements of an athletic room environment. Built to last, these lockers feature knocked down construction, rugged 14 gauge doors, a heavy gauge body, multiple latching options and our premium paint finish throughout.

#### Standard Features:

**Material:** Door - 14 ga. mild cold rolled steel. Body - 16 ga. mild cold rolled steel (18 ga. backs).

**Assembly:** Knocked down (KD), assembled with rivets or nuts and bolts.

**Hinge:** Full loop, 2" 5-knuckle hinges nested in door slot; welded to frame and double-riveted to door.

**Handle:** Tiered - stainless steel recessed handle with plastic-protected lifting trigger. Able to accept a padlock or a built-in lock. Meets ADA requirements for accessibility. Box - finger operated trigger punched to accept a padlock.

**Latching:** Tiered - quiet, multi-point latching on heavy gauge frame hooks with rubber silencers that reduce noise. Concealed quiet lock bar locked in place and isolated from metal to metal contact by polyethylene glides. Box - spring latch device welded to door automatically engages upon door closure.

**Ventilation:** Door (tiered) - large diamond perforations; doors (box) - small diamond perforations; Side - large diamond perforations - solid sides can be requested for either row ends or all sides.

#### Optional Features:

**Material:** Door - 14 ga. galvanized steel. Body - 16 ga. galvanized steel; stainless steel bottoms.

**Assembly:** Knocked down (KD), assembled with Keps nuts and bolts or rivets.

**Hinge:** Continuous "piano" style hinge.

**Handle/Latching:** 7 ga. plated steel turn handle for three point latching at top, side and bottom of locker.

**Ventilation:** Louvers; full louvers; mini-louvers.

**Republic's Qwik-Ship Lockers** are in stock for immediate shipment. They feature heavy 16 or 18 gauge steel doors mounted in welded frame assemblies for strength and durability. Reliable recessed handle and proven latching system ensure maximum security, while louvers provide ventilation. Lockers are conveniently available in pre-packaged, 1-wide and 3-wide groupings. Lockers include 6" legs for an overall finished height of 66" or 78". All sizes shown are in stock in #83 Decorator Tan. Part numbers with an \* are also available in #50 Gray.

### Standard Features:

**Material:** Door - 16 or 18 ga. mild cold rolled steel. Body - 24 ga. mild cold rolled steel.

**Assembly:** Knocked down (KD), assembled with nuts and bolts.

**Hinge:** Full loop, 2" 5-knuckle hinges nested in door slot; welded to frame and double-riveted to door.

**Handle:** Stainless steel recessed handle with plastic-protected lifting trigger. Punched to accept a padlock or a built-in lock. Meets ADA requirements for accessibility.

**Latching:** Tiered-quiet, multi-point latching on heavy gauge frame hooks with rubber silencers that reduce noise. Concealed quiet lock bar locked in place and isolated from metal to metal contact by polyethylene glides. Box - padlock hasp and steel strike plate with integral door pull.

**Ventilation:** Louvers; door perimeter.

### Optional Accessories:

**Front and End Bases:** 20 ga., used to close the bottom areas between locker legs.

**Individual Sloping Tops:** Provide a finished appearance and discourage the use of locker tops as storage areas. End Panels are required to close ends of locker groups - order separately.

**Recess Trim:** Used to cover the gap between lockers and walls in a recessed installation.

**Fillers:** Corner angles, angle fillers and slip joint fillers are used to fill open areas or corners between individual units.

# NEW LOCKERS AND ACCESSORIES

## Finish Trim

**6" legs** can be added to all lockers. Front legs are an extension of vertical frames. Adjustable rear angle legs are provided for every third upright in a row.

**Recess Trim** has a 3" face and a 3/8" top return. Integral corner caps and hairline joints reinforced with welded-on splice fingers create a clean frame effect for recessed lockers.

**20 gauge Closed Front and End Bases** may be used to close the bottom areas of lockers with legs.

**Individual Sloping Tops** provide a finished appearance and discourage the use of locker tops as storage areas. The rise is 1/3 of the locker depth. Standard flat tops are omitted when sloping tops are used.

**16 gauge Zee Bases** raise lockers above the floor and create an overhang or "toe space" for lockers. Zee Bases are available in 3", 4" and 6" heights.

**Continuous Sloping Tops** provide a finished appearance for lockers mounted along walls or in island groups. The rise of the slope is 1/3 of the locker depth. Customized installations with sloping top splices, valley corners and hip ends - all with concealed fasteners.

## Ventilation

**Standard Louvers** are arranged in patterns of six, three or two depending on door size.

**Verti-Vent Perforations** in the top and bottom flanges of locker doors enhance perimeter ventilation.

**Diamond Perforations** are 3/4" w x 1-1/2" h and are standard in doors and uprights of athletic lockers.

**Round Perforations** are groups of forty-two 1/2" holes on 1" centers arranged in various patterns on backs and uprights.

**Full Louvers** add extra ventilation by extending the louvers for the full height of the locker door.

**Mini-Louvers** provide ventilation of athletic lockers while concealing locker contents. 3/4" w x 3/8" h, they are available on all athletic locker doors.

**Small Diamond Perforations** are 7/16" w x 15/16" h and are available in uprights and doors of athletic lockers.

**Visual Slots** 5/8" w x 1-1/8 h provide free air flow through the locker.

# LOCKER REFURBISHING

## **Refurbish your lockers at 10% to 20% of Replacement cost!**

Your lockers can be totally restored!

- Parts replaced as necessary.
- Lockers re-anchored.
- New lockers installed for extra capacity.
- Prepare locker surfaces.
- Lockers repainted using an electrostatic process.
- New number plates attached.

If you can't replace your lockers with new, refurbish them and give your school a face lift while saving your valuable budget.

***Please call our office or visit our website at [www.centarind.com](http://www.centarind.com) and fill out a form under locker refurbishing for a free evaluation and estimate! Not available in all areas.***

Your lockers will go through extensive inspections. Everything will be done to bring your lockers back to 100% functionality. Any parts that may be missing or faulty will be replaced, including hinges, latches, or if necessary the entire door. Bolts are replaced with rivets for even better security and longevity. After the lockers are completely restored, banks of lockers are inspected for proper installation to the wall and are anchored where necessary.

Then the real restoration begins. Centar uses only the highest quality paint. Polyurethane or 2 part epoxy with an optional clear coat. For a long lasting paint finish we use electrostatic refinishing. The locker surfaces are prepped, washed, and areas not to be painted are masked. Then the lockers are painted with a base coat, top coat and finally a texturing coat that will give the refurbished lockers the appearance of new at a fraction of the cost.

Once the lockers have been painted new number plates will be added and the handles and locks will be reinstalled (new locks are available for an additional cost).

# NEW TOILET PARTITIONS

## HEADRAIL BRACED

For easy, economical installation, the Overhead Braced is the best choice. This unit does not require any special floor construction, therefore it can be used in old or new buildings. The rigid overhead bracing gives additional strength over the floor braced models.

## FLOOR BRACED

While not as sturdy as the Headrail Braced model, these units have a more modern appearance.

## LAYOUTS

"BETWEEN WALLS"

"IN A CORNER"

"FREE STANDING"

"ALCOVE"

When ordering partitions, please provide the following:

### 1. Measure Stalls:

A = Stall width and  
B = Panel size  
or  
C = Overall stall depth and  
D = Overall width

### 2. Type of Layout:

- ☐ In-corner
- ☐ Between Wall
- ☐ Free Standing
- ☐ Alcove

### 3. Style of Partition:

- ☐ Headrail Braced
- ☐ Floor Mounted
- ☐ Ceiling Hung

### 4. Material Desired:

(see page 62)

- ☐ Baked Enamel
- ☐ Fiberglass Reinforced Plastic
- ☐ Solid Plastic
- ☐ Phenolic Core
- ☐ Stainless Steel

# CHAIR STORAGE MOVERS/FOLDING CHAIRS

## HANGING FOLDING CHAIR STORAGE TRUCK-FULL SIZE

### Model FCC84

Double-tier design saves space and holds up to 84 standard folding chairs. Built from 16-gauge square tubing for excellent strength. 4" heavy duty swivel casters assure the cart will actually roll when fully loaded. Exclusive chair stops prevent chairs from vibrating off.

- Overall width: 31".
- Overall height: 72"
- Overall length: 68".
- Casters: Four 4" full swivel
- Assembly required.
- Shipping weight: 88 lbs.
- Black finish.
- Two cartons. Must ship via truck.

Actual chair capacity is determined by the thickness of your chairs.

## HANGING FOLDING CHAIR AND TABLE STORAGE TRUCK

### Model 935

This unit does double duty, toting and storing folded chairs and tables. Holds approximately 36 folding chairs (allowing 2" per chair). Bottom holds up to 8 folding tables. Unique design offers convenience and flexibility.

- Overall width: 33-1/4".
- Overall height: 70" when empty.
- Overall length: 67".
- Casters: Four full swivel phenolic, 4" x 1-1/4"
- Assembly required.
- Shipping weight: 88 lbs.
- Two cartons. Must ship via truck.

Tables can not exceed 30" in width and must be 72" or more in length.

## FOLDING/STACKED CHAIR DOLLY

### Model 600 & 601

A tote that moves folded chairs. A must for every office building, school or club, the tote moves and/or stores folding chairs. One push handle, one retaining handle.

600 Model  
601 Model

- Overall dimensions:  
600 measures - 38-1/2H x 19-1/4"W x 81"D and can hold up to 35 folding chairs  
601 measures 38-1/2H x 19-1/4"W x 109-1/2"D and can hold up to 50 folding chairs.
- Casters: Two full swivel, two fixed. On extra swivel for 601 series.
- Shipping weight: 58lbs (600) & 67 lbs (601)
- Must ship via truck.

## Premium Steel Folding Chair

- The best selling folding chair with a double contour, full size back.
- 18 gauge steel tubing with 2 riveted cross braces and 2 hinges for added stability and durability.
- Available in blue, gray, beige, black, brown and red.
- **Add \$7.00 per carton for red chairs.**
- Replacement chair tips are shown on page 44.

Cat. No. C20-X

Sold in cartons of 4

## STACKED CHAIR DOLLY

### Stacked Chair Dolly

Move up to 16 chairs at a time, eliminating costly and tedious hand carrying. The sensible solution to quick and easy setup time for seating at banquets, lectures, conventions and meetings. Tough and durable, the Stacked Chair Dolly accommodates most kinds of stack chairs. Heavy-duty frame with bonded vinyl handle. A real time-saver.

### Model 500

- Load capacity: 240 lbs.
- Overall width: 14-1/2".
- Overall height: 48".
- Overall depth: 33-1/2".
- Two 8" x 1-3/4" skid-resistant wheels.
- Powder coated gray finish base.
- Packed one per carton.
- Shipping weight: 31 lbs.
- UPS shipping weight: 70 lbs.
- Some simple assembly required.

### Model 550

- Specifically designed for use with extra narrow chairs. Features four wheels for added stability.
- Load capacity: 240 lbs.
- Frame width: 10-3/8".
- Overall height: 48".
- Overall depth: 33".
- Four 8" x 1-3/4" skid-resistant wheels.
- Powder coated gray finish base.
- Packed one per carton.
- Shipping weight: 33 lbs.
- UPS shipping weight: 70 lbs.
- Some simple assembly required.
